Rob Ives : Make Your Own Movie Machine: Build a Paper Zoetrope and Learn to Make Animation Cells before purchasing it in order to gauge whether or not it would be worth my time, and all praised Make Your Own Movie Machine: Build a Paper Zoetrope and Learn to Make Animation Cells:

Discover the magic of animation with this complete guide to creating a paper zoetrope. A forerunner to the modern movie, the zoetrope offers the illusion of motion from a series of individual pictures. Suitable for ages 13 and up, the

book contains simple, well-illustrated instructions for assembling a viewer as well as a guide to designing custom animation strips using photographs and drawings. Five pre-made animation strips a walking dog, an exercising man, a rocking fox, and other images help you get started. The book explains a variety of animation techniques for creating your own features, including stop motion animation, classical animation, and poseable paper characters. The approaches are as simple as pen-and-paper cartoons and as sophisticated as video clips taken with a digital camera and using your imagination is the best method of all.
