Light up your home with the most complete collection of lamp ideas around. Transform virtually any object into a unique lamp, make one from simple raw materials, or salvage those old, neglected lamps with a contemporary makeover. Tips cover selecting the perfect shade, as well as the pros and cons of various light bulbs. A gorgeous color gallery provides endless inspiration.

From Library JournalDecorative lamps sometimes produce better interior design statements than good light, but they are fun to have around. The lamp projects in this book are definitely not ordinary desk lamps. These are the creations

of a group of artists who use such things as stacked flowerpots, copper tubing, beads, or metal colanders as raw materials. Some lamps and shades are made from scratch, while other projects involve old lamps with new decoration. A delightful selection for public libraries. Copyright 1999 Reed Business Information, Inc. "Lamps that will attract attention even when the light is off." (Good Housekeeping magazine)
