Duy Nguyen : Making Paper Boats: 9 Boats that Actually Float! before purchasing it in order to gauge whether or not it would be worth my time, and all praised Making Paper Boats: 9 Boats that Actually Float!:

0 of 0 people found the following review helpful. Skip this fleet! By Nancy Ring Just wanted to make canoes for an Easter Boat Race. Impossible for me and for my PHD husband as well.! What am I supposed to do with all this carefully waxed paper? Nancy Ring 0 of 0 people found the following review helpful. Do not get this. By Alicia Riley When I spotted this kit at the store I thought "Aww cute! Origami boats that you can make and float. Perfect way to entertain the little kids in the family!". Little did I know the horror that awaited me when I open the box and spotted the name Duy Nguyen. This is not the first book/kit of his/her that I had difficulty with. I found once again directions were difficult to follow and pictures do not match up with the instructions. Save your money and buy either wax stick or wax paper and find origami boats online to make. 2 of 2 people found the following review helpful. Too hard... By R. Bunge Like the other reviews... The directions are not very clear. This is a weakness in many books about folding paper, as it is difficult to represent the three dimensions on the flat surface. This book could use directions where the directions matched the designs on the supplied paper. Even when completed, some of the designs are not sea worthy. For example the cruise ship capsizes right away. Neat concept, but certainly not good for most, especially younger kids who are looking for play time.

Set sail, with a fleet of water-resistant paper boats. From a graceful catamaran to a stealthy submarine, these nine nautical projects are easy to construct using creative origami techniques. Simply rub the waterproofing stick onto the designated areas of each preprinted origami sheet before making any folds. The boats will become amazingly water

resistant-and ready for an outing in the tub, a pond, or a lake.
