**Janice Zethraeus : Making Wire Jewellery** before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Wire Jewellery:

0 of 0 people found the following review helpful. Three StarsBy Madonna R. BushI was not that inspired by the author's designs, but the instructions were understandable.

Precious metal wire is a versatile material that can be used to great advantage in jewelry design. This book focuses on using soldering techniques to confidently construct wearable wire jewelry designs. It incorporates fundamental skills such as cutting, filing, annealing, and soldering, and encourages the maker to master these basic techniques, so they

can create individual articles of wire jewelry using their own inspiration and designs.

About the Author Janice Zethraeus is a London-based designer-maker specializing in precious metal wire jewelry. Influenced by her background as an illustrator, she is inspired by the undulating design and making techniques, and exhibits in venues across the UK, including the prestigious Goldsmiths' Fair.
