This is an exact copy near as I can tell, except for the omission of Ed Rosenthal's name, so I am guessing they duked it out and this book is the result! :) Anyways, its a great book to have in one's

library and for \$19.95, it's a steal.0 of 0 people found the following review helpful. Five StarsBy KCGreat information!!!0 of 0 people found the following review helpful. Excellent.By michaelThis Guide is extremely well written and has plenty of photos. The information contained inside will guide anyone from a new grower to the most advanced. Excellent.

Scientifically rigorous enough for a professional botanist yet accessible to anyone who wants to grow their own marijuana, this book is illustrated with 164 photos, 64 in color, 29 line drawings, 30 tables, charts, maps.
