Grzegorz Szymanowski : Mig-19pm (TopShots) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mig-19pm (TopShots):

Includes free decals and masking foil Packed with color photos The Mikoyan-Gurevich MiG-19 is a Soviet second-generation, single-seat, twin jet-engined fighter aircraft. It was the first Soviet production aircraft capable of supersonic speeds in level flight. With the MiG-19PM variant, which entered production in 1957, the cannons were removed, and it was armed with 4 Kaliningrad K-5M beam-riding missiles. This monograph features many color detail photos, making it an ideal publication for the modeler. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.
