Gunther Vogt : Miniature and Panorama: Vogt Landscape Architects, Projects 2000-2012 before purchasing it in order to gauge whether or not it would be worth my time, and all praised Miniature and Panorama: Vogt Landscape Architects, Projects 2000-2012:

Using a typological structure (landscape, park, square, garden, promenade, etc.), Gunther Vogt describes the theoretical

foundation on which the successful projects of Vogt Landscape Architects are based. In recent years the office has realized international projects in Europe and the United States, including a new type of city park for the Tate Modern in London (with Herzog de Meuron); an "all-weather garden" with great poetic power at the Hyatt Hotel in Zurich (with Meili, Peter Architekten); an indoor tropical garden for the Novartis Campus in Basel (with Diener Diener); and the exterior spaces of the Allianz Arena in Munich (with Herzog de Meuron). This new and extended version of one of our best sellers also documents recent works, such as public realm and streetscape designs for the athletes village of the Olympic Games in London 2012.

From the Inside Flap Using a typological structure (landscape, park, square, garden, promenade, etc.), Gunter Vogt describes the theoretical foundation on which the successful projects of Vogt Landscape Architects are based. In recent years the office has realized international projects in Europe and the United States, including a new type of city park for the Tate Modern in London (with Herzog de Meuron); an all-weather garden with great poetic power at the Hyatt Hotel in Zurich (with Meili, Peter Architekten); an indoor tropical garden for the Novartis Campus in Basel (with Diener Diener); and the exterior spaces of the Allianz Arena in Munich (with Herzog de Meuron). About the Author Gunter Vogt is a landscape architect and owner of Vogt Landscape Zurich, with branch offices in Munich, Berlin and London. Since 2005, he is professor for Landscape Architecture at ETH Zurich.
