This is a thought provoking book. It seems that too many modelers try to build (and become frustrated with) an "empire". The concept promoted by the author is to include what is important to the viewer and little else.

I had really high hopes for this book and it didn't meet them and instead fell flat. Although the concept is useful, the information could've been presented better and in a more interesting and engaging way. Strict adherence to minimalism is not my style

Its okay, but not what I had expected!

Why do we build model railroads? The answer is to capture some piece of the essence of railroading.
