This is the first of a series of publications designed to be used as teaching or learning aids to be used by teachers to develop clay modelling skills themselves or as classroom projects to develop pupil's clay modelling skills. The models

are based on years of experience teaching in nursery and primary education and with groups of adults and children with special educational needs. Each book contains several practical projects, demonstrated in a step by step manner enabling you to create the models shown on the cover.

About the Author Practical potter with twenty years hands on teaching experience in nursery and primary schools. Pottery work with youth groups and adult groups. Ten years as a college lecturer teaching pottery skills to youths and adults with special educational needs. During this time I documented the development of the practical pottery projects which I have decided to share with anyone wishing to develop their clay modelling and general pottery skills. I am also producing the same information as DVDs. Enjoy your clay modelling.
