Entertaining delightful book By Dedicated Gardener This book is truly entertaining but also gives very real gardening advice and wonderful ideas and inspiration. Cassandra Danz breaks the book into a chapter for every month which makes it easy to follow what garden tasks she does each month. She is hilarious as she describes her garden, her gardening style, and even her family, neighbors, and friends. Cassandra's quick wit and humor often had me laughing out loud. I loved reading the description of her garden. With

the map in the front of the book I got a definite picture of how the garden laid on the land. It all develops into a fun, enjoyable, and instructive read that I loved. I first checked this book out of the library on the recommendation of a friend but I liked it so much I decided I wanted it in my personal library. I'm definitely planning to read her other books.4 of 4 people found the following review helpful. Full of Ideas and Fun to ReadBy ChrisNYIf you want good looking gardens/landscapes but don't want to spend all your time tending, digging and chasing deer, this book is for you. Written in a month by month format, Danz writes about the typical tasks for each month and offers tips on how to make them easier. There are lists of fool-proof plants, how and when to plant and prune, plus lots of hints on setting up a garden (there is more about garden design in her other book). You won't find garden lay-outs or landscaping plans which I admit I was looking for when I bought this book. But I've ended up using just about every tip in this book - my favorite being the "Old Newspaper Trick" - and though I'll never be a die-hard gardener, they've helped make the whole process almost fun.0 of 0 people found the following review helpful. Fun once, then pass it on . . .By CustomerFun to read once and pass on, which is why it's easy to buy a used copy. Not a garden library keeper, but fun reading nevertheless. Might be nice in a gardening gift basket for a woman; some racy allusions, so gift accordingly.

Witty, informative, and fun, Mrs. Greenthumbs proves that Cassandra Danz is to flower gardening what the Frugal Gourmet is to cooking! More like an experienced neighbor than a gardening authority, she offers advice based on hard-won experience that just can't be found in other gardening reference books. 13 line drawings.
