Ewasyn"Masahiro Chatani" I remember you once telling us at a show, to try looking at your subject and trying to share the idea of what the architect was seeing as they conceived their original drawings or renderings of what they wanted you to see in their structure and designs. "Origami Architecture: American Houses Pre-Colonial to Present" brings some much needed dimension to those buildings and structures that we had taken for granted. While many of us just took a picture of many of these styles of 'American Architecture' and said a thousand words, this is not the case for this book. The simplistic dimensions reveal themselves in the cutout designs and give the buildings new life. I just wish that the book was thicker with more content than the pre determined standard, like most of 'Chatani's' work. Like all his books though, I find them full of great value. For those interested in the fine art of 'Kirigami', this book has something for all our talents to explore. For those new to the art form and those advanced, this is a 'fun' and entertaining endeavor.Enjoy!0 of 0 people found the following review helpful. Perfect Primer for those wanting to learn Origamic Architecture from the paper engineering master himself.By Cacao NutProfessor Masahiro Chatani created OA pop-ups for his architecture students to learn about design. 20 uniquely American designs are featured within, from a Native American Indian TeePee and Taos Pueblo to works of Frank Lloyd Wright Peter Eisenman. With templates skill levels for the beginner advanced.0 of 0 people found the following review helpful. Good funBy Phillip A. FosterIs a great

book for kids to build paper models. Makes you think in 3 dimensions, so it's good for understanding geometry. You can copy the designs so you don't have to use the book projects. Definitely you need card stock as your paper. You can get that from OfficeMax or Staples, or any good office supply store. Great projects for teachers to use with their students. It's fun for adults too!

Provides instructions and diagrams for making pop-up paper models of American houses, including a tepee, pueblo, old Dutch parsonage, and mansions.
