It is a boxed set that has an origami book, a chess board, and papers to fold the chess pieces. The book is lovely - nicely illustrated with detailed folding diagrams. The chess board is very nice - It unfolds into a board that is about 20 inches square. There are many models of cats and dogs. They are folded separately and then glued onto a base to make the chessmen. The cat and dog models are very nice on their own, but they are a bit complex. Box measures about 11 inches square. It opens like a book. Inside is the stuff - the book, chessboard and papers. These items are encased in a plastic "clamshell" type package that is glued to the inside bottom of the box. It was very difficult to remove this from the box. The box is nice too - very sturdy with thick sides with a magnetic closure. And it is perfect for holding the chess board and the chess pieces. 2 of 2 people found the following review helpful. A dozen nice models of cats and dogs by a master origamist By Dan SFun to fold and give to your pet-loving friends even if you don't care to make the whole chess set. The included fur-printed duotone paper enhances the models, and there is enough for two entire chess sets. Recommended for intermediate folders. 0 of 2 people found the following review helpful.
