By Catherine Michael 4 stars because the paper is very nice, but the booklet is trivial and the packaging is problematic for 2 reasons: 1. It is deceptive because there is so much waste space that I was able to easily fit the contents of two boxes into one box ( I had also ordered the Kimono designs box, which is the same set up.). While the box clearly states the number of sheets, it makes it look like there should be much more. I expect a child would think something was missing. 2. The internal box setup is sort of a "presentation" deal, not well suited for storing and using the papers. It is even larger than necessary for the largest size of paper. and the way the internal partitions for the 3 sizes of paper are made makes it easy to ding the corners or

edges if you are not careful taking the packages in and out. I've had these caveats with many of Tuttle's publications and boxed sets. The box itself is attractive and fairly sturdy, so I will probably use it for modular unit projects in progress. 2 of 2 people found the following review helpful. Love the paper prints. By Twiny. The prints are beautiful and love have three different sizes of paper...also the back side of the paper is a contrasting color that goes with the printed side...paper is easily folded...I did order another box which has different prints...
