Celata Unlike a prior reviewer I thought the product information was pretty clear on what was included, one sided, patterned 6 3/4 x 6 3/4 paper. here's a nice touch tho, that I thought was unusual- the non-patterned side is colored the same as the background of the patterned side, not white, and I thought that was just SUPERB. I am very pleased with the patterns, I have never had good luck finding patterned paper in stores. It is just the size I want as I want to try making Origami jewelry. anyone looking for double sided larger paper can find it here, I bought a pack of that too, and was very surprised, I'd never seen patterned paper before. The little directions are a good starter, but there is also a beginning book offered on : Easy Origami by

John Montroll that is a wonderful starter- gets you up and running with no frustration or heavy learning curve- marvelous for children or newbies. 4 of 4 people found the following review helpful. Good paper for beginners By Will Kaliff I like this paper. It is thin yet durable and it has a little bit of a vellum feel to it similar to the outer wrapper on a chocolate bar. Not quite but similar. It comes in a variety of colorful small print repeating patterns and on the opposite side of each sheet is the corresponding solid color. The picture on the cover shows patterned color on one side and blank white on the other but this isn't what I got. Being almost seven inches square means it is a little bit easier to work with. It comes with a fold out booklet that gives you some introductory folding instructions and six different projects: Swan, Pig, Tortoise, Samurai Helmet, Rowboat, and Star Box. One nice thing about these folds is that they have a Japanese Origami feel to them; The folds in the booklet would be a bit of a challenge for absolute beginners but if you have done a little origami you will get them. See my accompanying picture that shows some of the paper and the six projects in the booklet. 2 of 2 people found the following review helpful. Paper has a toxic smell By M. Collins A friend gave us some origami paper and we had fun with it, but we ran out so I decided to order some from . I wish I had just gotten the same brand of paper my friend had gifted us though, because when I opened this pack of paper we immediately noticed a strong, chemical smell. It was coming from the paper! It smelled so bad, that I decided not to even try to air it out. It smelled so toxic. We tossed it. I would never, ever buy this again and I cannot recommend it to anyone either. The paper had a shiny coating, which was probably the source of the smell. This was really disappointing.
