I wanted the larger 9 inch size to learn more complicated folding. The paper is kind of glossy - so the true form of the model is kind of lost. Plus the ink they used in the papers comes off in my hands. However I could have lived with all of that ....Except for one thing. I believe the manufacturer should not have listed these as origami papers. The paper is thick. So thick it is impossible to fold any model more complicated than folding a letter for an envelope. Because of the thickness, the paper is useless for me. It was only when I received the package that I noticed it said for the beginner folder. That should have been noted in big letters by the manufacturer. All they stressed in the product image was that the patterns were traditional. Meaning the manufacturer already knew it was thick and

not usable for the vast majority of origami models. I would have liked to send it back, but unfortunately I used some of the papers. Next time I will look only for those papers that have some kind of product description - an indication whether the manufacturer stands by their product. I used to buy wonderful Japanese and Chinese children's books from Tuttle. Beautifully printed and presented. That is why I trusted buying these papers. Too bad, how far their standards have descended. 17 of 17 people found the following review helpful. Good paper, nice size By Will Kalif I like the size of this paper (8 1/4 inches) It is good for big hands and for small hands. It comes in six different patterns and is double sided in that there is a pattern printed on both sides. One side is a pattern and the other side is the same pattern with the colors reversed. See my accompanying picture for the patterns. This package also comes with a small booklet that shows you how to fold six different items like (see my accompanying picture) a kimono, crane, Star box, lantern, fishing boat, and Hashi Wrapper which is good for holding chopsticks or pencils. The paper itself is pretty good and it holds sharp creases and is durable. So, if you are a beginner this is a good paper for you. It is also good paper for kids because of the durability and the larger size. And as a little bonus you also get a nice sheet of gold paper which you can save for a special project. 0 of 0 people found the following review helpful. Okay By Jennifer This paper looks pretty but doesn't really hold up too well with more than a few folds. Reversing folds really breaks down paper. I would only recommend for simple models or modulates with a small number of folds.
