The only problem, I found out, is that it's a much older edition than is currently being sold, and there's a BIG difference in the two versions. The one I bought was very helpful, but I did wind up buying the later version because it had some updated info that I needed. No regrets, however, however, It's good to have both books. I would use and this seller again at any time, only being careful about looking at editions numbers.0 of 0 people found the following review helpful. i love model trainsBy rodney j johnson jr, arvada, coloradoand i love playing with my airbrush. at present i'm just painting bicycle helmets,but working on the courage to work smaller and this book is a joy to read andgain encouragement from.0 of 0 people found the following review helpful.
