**Carmel D. Morris : Paper Boats!: Fold Your Own Paper Boats, Ships and Yachts to Sail the High Seas!** before purchasing it in order to gage whether or not it would be worth my time, and all praised Paper Boats!: Fold Your Own Paper Boats, Ships and Yachts to Sail the High Seas!:

1 of 1 people found the following review helpful. Three StarsBy JoAnn Smithhave to get the kids in the right mode to want to do this.0 of 0 people found the following review helpful. Nice easy-to-follow diagramsBy CustomerThis is a

fun book for me, and my kids! The models are simple which is great, except for the aircraft carrier which takes a bit of fiddling with to get it floating right, my son solved that with a foam piece underneath and plastic sheeting he folded instead of paper. I really like the way the author inspires the reader to use his or her imagination to problem solve, instead of facing over-complicated diagrams to make kids give up so quickly. Some models are very simple which seems to be the level of skill the author is aiming for; young people who want to make some fun model boats without headaches - you'd have to be a dumb-dumb not to understand the diagrams in this book! We sit around the family table making these for school displays, and even painting our boats in acrylic for extra 'floatyness', it's great fun. I of 1 people found the following review helpful. Awesome variety of models By Boris Grishenko Lots of different types of origami boats for kids but even as a parent I can follow the diagrams, very straightforward instructions. And they float too! The ocean liner was tricky but we made a big one and it looks good. Only a couple of models use cutting, most are folded from one piece of paper, some having additional sail sections. Most dummies can make the models in this book, I know I can!

Ahoy shipbuilders and sailors, here's a neat book to get you folding your own speedboats, liners, sailboats or even an aircraft carrier on which to land your paper aircraft! Most of the models are easy to build so even the smallest deckhand can learn the ropes and become a boat building expert. There are 11 different boats to make plus a seaplane with water-skis. Spray your paper boats with lacquer spray or fold them using wax paper, paper backed with aluminum foil or plastic sheeting and you'll have some great models that will last on the water and be ideal for water races in the swimming pool, bathtub, river or sea. Written by the best-selling author of *The Best Advanced Paper Aircraft*, these models are sure to please those who also love water or simply wish to muck about with paper boats. Preface Introduction Folding Symbols Folding techniques Canoe Gondola Row Boat Speedboat Sailing Boat Two-in-one Yacht (with Jib/Catamaran) Easy Catamaran with Sail Rich Dudes Cruiser Seaplane (that flies and floats) Pirate Ship Ocean Liner Aircraft Carrier This compact paperback has many fold-only models, plus those that use scissors and others that use more than one piece of paper, so there is a level of skill for all the family. So start folding and build your own collection of boats, ships and yachts today! First published by Harper Collins (Sydney, New York, London) as a print edition, along with European and South American editions.
