Masahiro Chatani : Paper Magic: Pop-Up Paper Craft: Origamic Architecture before purchasing it in order to gauge whether or not it would be worth my time, and all praised Paper Magic: Pop-Up Paper Craft: Origamic Architecture:

15 of 15 people found the following review helpful. A TREASURE TO OWN
By Texas Girl
Any book by Masahiro Chatani is a treasure for one who is interested in origamic architecture and beautiful paper. Many of this "master's" patterns are far too complicated for beginners, but this little book is easy to use and has beautiful patterns for pop-up cards. It can be used by adults who have basic cutting and folding skills along with a bit of patience. I have made many of the cards in the book and my friends love receiving them. I even love looking at the photographs of his work.

Really stunning. From wikipedia.com: "Masahiro Chatani was a Japanese architect (certified, first class) and professor considered to be the creator of origamic architecture. [5] From its development until his death in 2008, he was widely acknowledged to be the world's foremost origamic architect." 0 of 0 people found the following review helpful. This item arrived quickly and in good condition. I wasn't happy with the direction provided ... By R. Burke This item arrived quickly and in good condition. I wasn't happy with the direction provided by the author and would not recommend it to those seeking directions on making pop-up architecture. 0 of 0 people found the following review helpful. Five Stars By Customer Simple easy to follow instructions for making beautiful and impressive pop up cards.

With full-size, marked construction drawings, you can easily make such works as temples, castles, flowers that open and dragonflies that actually move.
