Enjoy and Appreciate HerbsBy Jerry L. RayI reordered this book after giving one to a friend. My first contact with this book was over 20 years ago when my mother gave me a copy. It was published by the George W. Park Seed Company of Greenwood, S.C. Growing herbs is easy, enjoyable and great for cooking. From this little book I learned how to sprout seeds and grow my own plants and have used this knowledge to grow both herb and vegetable plants for many years. I now grow many types of herbs just for the enjoyment of their beauty, aroma and watching them grow. You will learn which herb plants are companion plants for vegetables and how to use them in recipes and which are suitable for your growing area or on a window sill. In short, anything you need to know in order to grow and appreciate herbs is in this book. There is a recipe on how to make Chive Blossom Vinegar which we have made for years to make salad dressing which is so good, I have seen people (secretly) drink the left over from the bowl.2 of 2 people found the following review helpful. Great little piece of herbal history.By PhoebetalesI love this little book. While some of the information is definitely dated, this is a great addition to the library of anyone interested in tending their own herbal garden.
