Info is available online for freeBy SunshineIf you want everything in one place and not have to search the information online for free...then this is the book for you.This information is available for free online. Just hunt for it. You can find how to cram for the test, and the questions with only correct

answers or with correct and incorrect multiple choice answers to download for free...whichever suits your learning style. Returned book, never having opened it, after I found info online.1 of 1 people found the following review helpful. Best media for passing your Tech examBy William K.Best media for passing your Tech exam. I used this in conjunction with a test app on my phone, and passed on my first attempt. Read the boom in about week, was very easy to ready and kept me interested on what could be considered dry material. I highly recommend going this route over any other. Start here and you will have great results.0 of 0 people found the following review helpful. Technician Class Test PreparationBy ChuckA better and clearer understanding of the information needed to prepare for the Technician Class Test, than some of the other books available..

Here's a new approach to passing the Technician Class test. The test is multiple choice and the other study guides take you through the 426 possible questions including all four answers for each question. But three out of the four answers are WRONG! You are reading 1,278 wrong answers and that is both confusing and frustrating. The Easy Way focuses only on the right answers. All Ham and no Spam. The first part is a narrative of the author's ham radio experience. Every question and answer is woven into the story and identified in bold print. The second part is a 40-page Quick Summary. It gives every question and answer, with hints and cheats to help you remember. Other study guides take over 200 pages. Which would you rather study: 40 pages of right answers or over 200 pages with three quarters of the answers wrong? Instructors: This book is perfect for review or weekend courses. Have the students read the narrative before class, then go over the concepts with them rather than slogging through all those wrong answers. You'll be done in no time and the students will be fully prepared to take their tests.

About the AuthorCraig Buck was first licensed as an amateur radio operator in the mid-sixties. Today, he holds an Amateur Extra Class Radio license. "Buck," as he is known on the air, is an active instructor and a Volunteer Examiner and has successfully led many students through this material. Buck's ham accomplishments include being named Elmer (Trainer) of the year by the Rappahannock Valley Amateur Radio club three times. He also holds a position on the prestigious ARRL Honor Roll for having confirmed contacts with 335 of the 339 recognized amateur radio countries.
