Jane Greenwood : Persian Designs: Art, Embroidery, Craft, Textiles, Ceramics, Needlecraft (Design Source Book) before purchasing it in order to gage whether or not it would be worth my time, and all praised Persian Designs: Art, Embroidery, Craft, Textiles, Ceramics, Needlecraft (Design Source Book):

1 of 1 people found the following review helpful. My fellow reviewer and I love a lot of the same kind of books. This one is no exception.By Jane in MilwaukeeI too got this book for the possibility of creating a needlework project. While some of the designs don't do anything for me--thus the 4 stars--a couple of them really speak to me. I also want to do more goldwork and I can see using one of the simpler designs here to make a really gorgeous one. Well worth

the price.0 of 0 people found the following review helpful. Three StarsBy Martha PThe designs were large and lacked intricacy - not what I expected.3 of 3 people found the following review helpful. very good size for embroideryBy M. PollerThe designs are great for goldwork which uses large simple shapes. Most of the designs can be even further simplified with lines removed and also enlarged in some cases. Could also work for other embroidery types.

Persian design has a rich and fascinating history. Textiles, books, ceramics, architecture - all were adorned with intricate and decorative patterns reflecting Persian culture. The pictures, patterns and motifs in this book represent a celebration of this love of artistry and the illustrations are adapted from original designs. Here you will find images that can be adapted for your own projects, or used directly to decorate textiles, china, glass, metal, wood and more. You can create your own greetings cards, produce personalised posters, or use elements of the designs to create borders and frames.
