Raymond A. Cloyd : Plant Protection: Managing Greenhouse Insect and Mite Pests before purchasing it in order to gauge whether or not it would be worth my time, and all praised Plant Protection: Managing Greenhouse Insect and Mite Pests:

This introduction to the basics of managing insects in a greenhouse environment discusses insect and mite feeding behaviors while offering excellent descriptions and photographs of several economically significant pests, including whiteflies, thrips, and leafminers. This resource covers the details of handling and applying pesticides, including modes of action and pesticide rotation, tank mixes, application timing and coverage, plant phytotoxicity to pesticides, and proper pesticide storage. Ideal for horticulture students, beginning growers, and experienced hands who could use

a refresher on safe and effective control of greenhouse insects, this guide helps growers maximize a crop's economic value by helping identify and properly treat pest problems before it is too late.

About the Author Raymond A. Cloyd is an associate professor at Kansas State University. He has published more than 200 trade journal articles on topics related to pest management in greenhouses and he is the author of *IPM for Gardeners and Pests and Diseases of Herbaceous Perennials*. He lives in Manhattan, Kansas.
