Masahiro Chatani : Pop-Up Gift Cards before purchasing it in order to gage whether or not it would be worth my time, and all praised Pop-Up Gift Cards:

4 of 4 people found the following review helpful. A TREASURE TO OWN By Texas Girl Any book by Masahiro Chatani is a treasure for one who is interested in origamic architecture and beautiful paper. Many of the master's patterns are far too complicated for beginners, but this little book is easy to use and has beautiful patterns for pop-up cards. It can be used by anyone who has basic cutting and folding skills along with a bit of patience. I have made most of the cards in the book and my friends love receiving them. From wikipedia.com: "Masahiro Chatani was a Japanese architect (certified, first class) and professor considered to be the creator of origamic architecture.[5] From its

development until his death in 2008, he was widely acknowledged to be the world's foremost origamic architect."4 of 4 people found the following review helpful. All Wonderful Things to MakeBy Raymond J E KnollThere are no buildings in this book! There are valentines, animals, shapes which make it an interesting change. I love it!1 of 1 people found the following review helpful. requires experienceBy G. SandersWhile most of this book is self-explanatory if you've had some experience with paper engineering there are parts that require a more thorough understanding and a lot of just figuring it out for yourself ... perhaps I'm a bit dim but I would have liked more detailed information on how to put the more involved ones together. Put on your thinking cap and be ready with your patience. The results are dramatic.
