Does not disappoint!By MaigsWhat I love most about this book is that Potted's creations are never too precious - but instead modern and innovative and unique. Perfect for my modern home, as well as for my modern-minded interior design clients. First their Los Angeles store - and now their book - have become indispensable to me. Most of their creations involve utilizing renewable, recycled and repurposed materials; and their instruction is very thorough and practical. A very inspiring read - with beautiful photos - that should motivate you to get creating!1 of 1 people found the following review helpful. I have so many succulents that are still in their original ugly containers because I haven't known exactly what to do with them. And buying planters can be expensive. This book has so many creative ideas for planters made from every day items. The step by step directions seem like they are relatively easy to follow and the results look amazing. I love this book so much that the day I got it I ordered a second copy for a friend. Can't wait to try the tubular PVC planter!!2 of 2 people found the following review helpful.
