**J C van Lenteren : Quality Control and Production of Biological Control Agents: Theory and Testing Procedures (Cabi)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Quality Control and Production of Biological Control Agents: Theory and Testing Procedures (Cabi):

The use of biological control agents has been increasing worldwide and there are now many companies mass-

producing such organisms, particularly for the control of insect pests. However, there is a great need for quality control in the production and use of these natural enemies, which include insect parasitoids and predators, fungi and viruses. This book has been written by leading scientists from Europe and North America to provide both background theory and practical guidance on this subject.

About the Author J. C. van Lenteren, Wageningen University.
