Antti V Raisanen, Arto Lehto : Radio Engineering for Wireless Communication and Sensor Applications (Artech House Mobile Communications Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Radio Engineering for Wireless Communication and Sensor Applications (Artech

House Mobile Communications Series):

A comprehensive, multidisciplinary overview of radio engineering. It should be useful to electrical engineers working in wireless communications and a host of other application areas, including sensors, navigation and radar. The text teaches professionals important techniques for the generation, control, detection and utilization of radio waves, and provides detailed guidance in radio link, amplifier and antenna design.
