D.J. Withers : Radio Spectrum Management (Iee Telecommunications Series, 45) before purchasing it in order to gage whether or not it would be worth my time, and all praised Radio Spectrum Management (Iee Telecommunications Series, 45):

Provides both food for the curious mind and insights on the complex issues around international and national radio

spectrum allocation. Many professionals will find this book a worthwhile starting point.

'Provides both food for the curious mind and insights on the complex issues around international and national radio spectrum allocation...many professionals will find this book a worthwhile starting point.' --IEE About the Author David Withers, OBE FIEE, retired from British Telecom in 1984 as Chief Engineer of its International Division. His career had been spent in the engineering management and direction of BT's international radio services. Since retirement he has served as an independent consultant, much of his work being with the UK Radiocommunications Agency.
