Kent J. Johnson : Realistic Animation, Lighting Sound : 21 Projects for Your Model Railroad before purchasing it in order to gauge whether or not it would be worth my time, and all praised Realistic Animation, Lighting Sound : 21 Projects for Your Model Railroad:

1 of 1 people found the following review helpful. Some Really Clever Ideas By John A Lee III This is not a book of theory. It is instead a collection of 21 specific projects that have appeared in Model Railroader Magazine. Some deal with animation and some deal with lighting. One deals with sound. What they all have in common are that they are relatively simple, that they are very clever and that any of them will go a long way towards sprucing up a model layout. For me, the price was worthwhile just to learn some clever tricks even if I never use them myself. It's a good buy. 0 of 0 people found the following review helpful. Great resource By Lanette A.
